Bachelor of Technology in Computer Science and Engineering

B.Tech CSE student with hands-on experience in Python, Java, JavaScript, Node.js, MySQL, and LLM APIs. Built practical projects involving AI Resume Analysis, AI Agents, and email automation, with experience integrating OpenAI and Google Gemini APIs. Interested in AI/ML, backend development and Data Structures & Algorithms, with a strong focus on building practical software solutions and continuously improving technical skills

TECHNICAL SKILL

Languages: Python, Java, C, C++, JavaScript, HTML/CSS
Backend: Node.js
Database: MySQL, TiDB Cloud
AI/LLM: OpenAI API, Google Gemini API, AI Agents, OpenRouter, Serper API
Developer Tools: Git, GitHub, VS Code
Core CS: Data Structures & Algorithms

Soft Skills

- Problem-Solving, Teamwork & Collaboration, Communication

PROJECTS

AI Resume analyzer

- AI Resume Analyzer | Python, Flask, OpenRouter, GPT-4o-mini, SQLAlchemy, SQLite
- Developed a Flask-based AI resume analysis platform that accepts PDF/DOCX resumes and extracts resume content using PyPDF2 and python-docx.
- Integrated GPT-4o-mini through the OpenRouter API to analyze resumes based on the user's target job role and identify relevant and missing technical skills.
- Implemented AI-generated learning roadmaps and role-specific interview questions using structured JSON responses.
- Built user authentication, session management, and report persistence using Flask sessions, SQLAlchemy, and SQLite.
- Designed a role-aware prompt pipeline that filters irrelevant skills and generates personalized recommendations based on the candidate's target role.
- https://github.com/SiLEnT-24/AI_ResumeAnalyser

Mail Sender App

- MailSenderApp | Java, Swing, SMTP, JavaMail
- Developed a Java-based desktop application for sending emails through an SMTP mail server.
- Built a user-friendly GUI using Java Swing for entering recipient details, subject, and email content.
- Implemented email composition and transmission using Java email APIs and SMTP.
- Structured the application as a NetBeans project with Apache Ant build configuration.
- SiLEnT-24/MailSenderApp

AI Agents

- AI-Agent / Talking to APP | AI, APIs, Python
- Developed an AI-powered application interaction system that allows users to communicate with application functionality using natural-language instructions.
- Integrated AI services with APIs and API-key based authentication to connect user requests with application actions.
- Designed the project around an AI-agent workflow for interpreting user intent and triggering appropriate application functionality.
- Developed the project incrementally through multiple development sprints with supporting documentation and reference material.
- <https://github.com/SiLEnT-24/AI-Agent>

EDUCATION

College	
Shri Aurobindo institute of Technology, Indore, Madhya Pradesh	2024 – 2028
B.Tech – Computer Science and Engineering	6.67/10 cgpa
Govt.Excellence H.S. School Madhavnagar Ujjain, Madhya Pradesh	2022
Class X	85%
Class XII	2024
	81%

CERTIFICATE

- The Joy of Computing Using Python — NPTEL, IIT Madras
- GitHub Actions — Microsoft Certified: GitHub Actions (GH-200)
- C & C++ Programming — Ypsilon IT Solutions
- E-Cell IIT Bombay – National Entrepreneurship Challenge 2025

PARTICIPATION &VOLUNTEERING

E-Cell Student Representative

- Represented the Entrepreneurship Cell and promoted entrepreneurship initiatives among students.

College Event Volunteer

- Supported coordination and execution of college events, hackathons and Auronova.
